Mysql local variables

May 10, 2007 / Gavin Jackson

code mysql programming

Just learned how to use variables in mysql - the variables are bound to the specific client session - and are destroyed on disconnect.

```
SET @varname = value

SELECT max(value) from table into @varname

SELECT @varname
```

More documentation is available at http://dev.mysql.com/doc/refman/5.0/en/user-variables.html
